polofreespirit@gmail.com

FORD E-450 SUNSEEKER 2011 Motorhome - RV

- Powerful, robuste and spacious.
- Ready for a round the world trip! It has everything you need and more. All that is missing is you.
- Very spacious Interior.
- And a slide-out for even more room.
- Compared to other RV'S - this one provides autonomy in water, electricity and gaz. Live off the grid for weeks.
- Fully equipped for navigation, internet and networks.
- Plenty of storage space in the cupboards and closets. Huge storage compartments for the rest.
- Exceptional water filtration.
- Can sleep 7 people with ease. AND 4 permanent beds.
- Complete bathroom
- A real Master bedroom.
- A privacy space for each child in their beds.
- A tried and true solid light-truck chassis built for 500 000 km's and serviceable the world over.

General Pictures 1

ITS STRENGTHS

- Are you looking for a véhicule for a long trip? What you need above all is autonomy and room. You cannot live for months at a time if you are constantly looking for water or electricity or sewage! After 4 years travelling we noticed the small vehicles are nearly always in campings or hotel parkings because they have no water or toilets or showers! They are dependant. Where is the liberty in that?
- You cannot change your interior set-up everyday. Modularity is great for a small trip. But you can't be making your bed and removing the table to go to the bathroom or to sleep. Can you live for months at a time packed like a city subway at rush hour? No. Have to get off your seat and fold the table to let someone go by! That's feasible for a week - not for a year.
- You need autonomy to go where you wish - away from the crowd. And a slide-out for even more room. You can live with the extension out or in. Opens at the touch of a button
- Loads of extra equipment that is tested and works.
- Gaz, electricity and water for days or even weeks at a time. Fully equipped with navigation and internet.
- Great water filtration to insure clean and quality water. No germs and turista for you.
- 7 beds. Of which 4 (or 5) are permanent and big.
- Sliding security glass windows. Roll with the windows open! Sleep with the windows open! Other RV's force you to travel or to park close to other objects with your windows (plastic to boot) closed.
- Complete and roomy bathroom. Shower and pee with the door closed!
- A real master bedroom. A private cocoon for each child. Loads of storage room.
- We can deliver it to you just about anywhere in america

ITS WEAKNESSES

No - it is not perfect no vehicle is.

- *No véhicule is. Each will have it's strengths and weaknesses. None can fulfill all the demands of people.*
- It is 1 meter (3feet) longer than a european RV.
- It is 15 cm's (6 in) wider than a européen RV. The width of a white line. (We have felt this is the bigger handicap than the length.
- It weighs 7 t loaded and ready to roll.
- 22 liters per 100 km's of gaz consumption at 90 km's. This can go up to 30 l in very steep hills and above 120 km's. this is as Surcharge of 5000\$ for gaz for a 80 000 km's trip compared to a european RV. (But still cheaper than the cost to cargo)
- Gasoline engine. (well for me that means no particle filters and Euro 4 or 5 diesel and sulfur problems - modern diesels are much more complex than modern gasoline engines)
- The grey water tank is too small in comparison to the others. (3 days autonomy only: but the easiest to empty also)
- Some materials and options are installed by me. They are not professionally installed and look less than perfect. however it works. ex: water filtration and recycling.
- the interior is definitely not euro chic! it is 1990's american yuck decor
- it looks big and square and bulky. So did Chewbacca and we loved him.
- You either love or hate the automatic transmission.
- The front seats are cheaper and do not pivot.
- No safe or safebox. Possible under the front seats. We have secret compartments everywhere.
- Driving lights are not great. Could be better.

MOTOR/CHASSIS:

2011 Chassis FORD E-450.

A real tested and proven truck chassis. Built for 500 000 km's of heavy use. Ask any Ford mechanic.

Motor TRITON - V-10 de 6.8 L - 305 cv

No antipollution or fancy diesel electronics problems.

5 speed automatic transmission, with Tow/Haul kickdown and climb options. Auto kick down option.

Reinforced chassis: PTAC: 6577 kg

Empty: 4590 kg

Height: 3m40. Width: 2m50. Length 8m56.

Presently is 9m40 with the bike rack and rear trunk.

- transmission cooler. Oil cooler.
- Air conditioning in ALL the cabin. YES: that includes the rear cell.
- ABS, Cruise control, Airbags, electric windows.
- electric rear view mirrors and heated.
- Multifonctions Jensen CAR STEREO. CD + FM + Weather / USB port / iPod ou iPad ou iPhone aux hookup
- Rear view camera.
- Optional Reinforced rear and front suspensions. New shocks. (107 000 kms)

CABINE/HOME:

ForestRiver SUNSEEKER 2650 CDW

This is the same motorhome that the rental companies use in their fleets. Built in a factory that is dedicated to rental fleets. It is built with the options that are solid and strong enough to resist to the abuse of intensive rental use. If your job is to rent RV'S: you know what works and what people want - and without making you go bankrupt.

- The longest and biggest front nacelle (bunk) on the market. You can sleep 3 adults side by side. No other RV offers this!
- Possibility to sleep 7. And 4 of the beds are permanent. No nightly nightmarish set-up!
- Closed off rear bedroom.
- Separate Shower / head.
- Slide-out - more room at the touch of a button.
- Kitchen table: permanently seats 5 and you can still walk around! Extension to seat a total of 7.
- Fully isolated for canadian winters. No fear of freezing and great cool comfort in the SUN!
- Even the water tanks are isolated against freezing or hot. Drink cool water whatever the weather.
- Sliding glass security windows. Tinted against sun and glare. Lightly tinted to hide inside.

EQUIPMENT / OPTIONS:

UNLIMITED ELECTRICAL AUTONOMY

3 independant sources of electrical 110V.

3 independent sources to recharge in 12V.

2 independent battery banks

You will have loads of power to live and recharge your life. And with backup systems to boot!

- *Autonomy and Backups!*

What a pleasure to never have to monitor or watch your electrical needs. Use all the lights you need. Recharge your computer anytime and all the time. Use the fridge or microwave as you desire. Run the ventilation and circulation fans all night or day. Stay for months without ever needing to start the generator nor the motor. Need 110v all the time: no problem. 12v also of course! Luxury is autonomy!

- 5 solar panels of 120 w each
- The best charge controller money can buy: Outback FlexMax60 with Mate 2 control center. It manages everything automatically and maintains your batteries on its own (automatic de-sulphurisation, MPTT, deep discharge/recharge / the only controller that you can decide what voltage hots the batteries at what temperature)
- An extra 60w independently wired solar panel and controller. Installed as a backup in case the other solar panels malfunction. OR to operate a minimum battery charge and air circulation in case of prolonged storage of the RV.
- 6 motorhome batteries: Total: 600 AH
- 1 motor battery: 120 AH
- Automatic coupling of both battery banks. At the press of a button you send the power of on battery bank to the other. No more run down batteries ever)
- 1 full time 100v to 12v battery charger: 55 Amp

- 1 backup emergency or float (storage) 4 amp charger
- 170 amp alternator with charge control solenoid. (charge both motor and cabin battery banks) (+ spare alternator in parts bin)
- 600 W PURE sine wave convertor (12v to 110v) We leave it permanently on. It is wired to feed only a closet and set of electrical outlets that are dedicated to recharge our computers, phones, cameras, etc. This way we have 24h a day 110v electricity for all our needs. This is pure sine and works with all motors or electrical materials.
- 3000 W Modified Sine convertor for the moments when you just need lots of power without the noise of a generator. Vacuum cleaner, microwave, air compressor.... This power goes to all the electrical outlets in the vehicle - including the computer plugs. We use it occasionally. To warm up a dinner, or quick vacuum. It is also the backup for the fridge. If you run out of gas: you can switch the fridge to this convertor and never lose your food!
- 4000W generator. This silent generator is permanently mounted to the chassis and has its own soundproofed compartment. It is all ready to go. Press a switch and presto! No need to pull out, set up, gas up and hear an external generator. Turn it on anywhere, anytime and it will give you unlimited electricity. You can recharge the batteries, run the central air conditioner, and everything else. We have rarely used it for more than 20 minutes - but in case it is there.
- All interior lights are DEL
- Exterior DEL lights
- Rear motion detected safety light
- Lights in most closets and storage compartments
- 12v and 110 V Electrical plugs all over.

WATER RESERVES: 8+ days for 4 people !

2 independent fresh water tanks: 150 l and 180 l.

5 permanent high quality water filters.

2 used water tanks (grey and black water).

Compare our water reserve capacity to the other motorhomes out there. We are hard to beat.

Additional comfort no you need to empty your sewage water by hand every 2 days - how many times a year do you put your hands in the

- Autonomy, capacity and security

- No tourista or sicknesses for my family!

Water is life - and it is comfort. The biggest luxury in warm climates - and a source of many complications in cold climates. Here : no worries.

- Main 150 Liters water reservoir. Freeze proof, insulated, in a heated compartment centered in the motorhome. Precise water gauge in 1%. The water is never frozen - nor is it boiling beurek hot to drink.
- Easy to fill, flush, clean, drain, or even winterize.
- Second 180 L water reservoir. Separate yet connected together. Easy to fill. Independent fill and drain from the first. Easy to transfer the water from one tank to the other. Safe because independent of the first. Yet easily transferable. This tank is not freeze proof as it is built of food quality stainless steel and is affixed below the chassis.
- Both water tanks pass through a very high quality water filtration system. this is a full sized house system.
- 22 micron Pre-filter before the tanks followed by
- permanent 22 micron filter followed by
- 5 micron filter followed
- charcoal and silver activated taste/odor filter
- Then A powerful UV light filtration that kills the bad guys...
- followed by a CERAMIC full size filter. (the same type of filter the Bear grills of the world use both much bigger)
- no need to treat your water with chlorine or other harmful products. No restrictions for filling up: you know your water will arrive to you clean!
- 3 water pumps. One back up for each of the tanks and a backup in the parts bin.
- Water Heater: 23 L of hot water in 6 minutes. interchangeable anode with spare. Runs on gaz. Instant and permanent hot water luxury.
- Two kitchen sinks for a happy kitchen! Better than some homes. Easy and economical dishes and cooking.
- independant hot and cold interior shower with glass door. Air magic shower. feels like a real home shower.
- Hot and cold exterior shower head.
- Grey water tank: 122 L (used water from the sinks and shower) Easily emptied in a minute by the pull of a lever. (this tank is a little small - but easy to drain)
- Black Water: 102 L (toilets) Ever empty your toilet? You can't appreciate the luxury of not having to empty and carry your poop to the closest toilet by hand every 2 days. Pull a lever and presto it is drained away. And 102 l should last a while...
- Both tanks are completely isolated from the cold. Freeze proof with heating pad and heated compartment.
- Homemade grey water recycler. It uses the fairly clean grey water to flush the toilet. Saves loads of water!
- plug and flush/rinse of the used tanks
- all the hoses and drain hoses you'll ever need
- possibility of draining with a simple water hose.
- All the necessary is included.

INTERNET ENABLED AND WIFI

2 wifi boosters and an internal network

- **Communicate. Reach and be reachable.**

Why travel the world if you can't keep in touch with your friends and loved ones.

- The idea is to be able to pick up all the free wifi networks that one can. For that you need a wifi booster. It picks up signals that are much further than you can usually pick up: and amplifies them for your use. Then you take the signal and distribute it in your motorhome on your own private network where one or all your computers, tablets, phones, or other can use.
- AND on top of that not only can your antennae pick up wifi: it can also share the signal from a 3g or 4g type of signal. From an USB 3g or 4g MIFI or Aircard Modem, or from a phone personal hotspot or even a cable connection.
- Direct plug and play for aircard and Mifi.
- Booster WIFI WifiRanger. GO2.
- This is one of the best boosters available. It is composed of not one : but two booster antennae. One outside mounted on the TV antennae where it can search for a good line of sight signal. The other inside where it distributes and plugs to and into easily.
- Both boosters are cabled to work together as one. This creates your signal.
- easily set-up. Even I could make it work.

To make things short:

FINDS a signal (wifi, 3g, 4g, cable, hotspot, etc)

AMPLIFIES IT (booster) then

SHARES IT (sub-network in your RV: wired or wifi)

NAVIGATION TOOLS AND READY TO GO ABLE

- *A full time 5 inch screen world GPS*
- *plus a full time dedicated iPad*
- *plus a back up camera and route planner /*
- **Find your way - anywhere and offline.**
-
- GPS GARMIN large screen RV760. This is a model specially built for RV's. It takes into account your size, weight and preferences to guide you where you want and not where you don't! It also contains over 14000 points of interest specifically for motorhomes and campers: propane, campgrounds, parks, rv service centers, etc... It has an internal memory of 8 GB plus a SD card of 32 GB. This is enough to store all your traces (everywhere you went) and the maps to go with it. Links to your PC or Mac with specific software to manage all your info. Download unlimited free maps (opengsm maps) and lifetime subscription to all Garmin Maps and updates. Links to your smart phone if need be. Traffic and weather in real time. And much much more.
- Simply put : a great GPS!
- 64 gb APPLE iPad : with GPS and 3G capability. This ipad has a complete offline mapping capabilities. It uses 3 different Apps and has 3 different sets of offline and already loaded maps. If one goes wrong : the other picks up. But we haven't yet seen it crash. This ipad has built in GPS, a big screen and plugs directly to the car stereo. You can even put a telephone card in it and share its connexion through the wifi booster.
- We fill it with music and play our tunes on the car stereo or network.
- it plugs to our PC and tracks our route and others.
- Backup camera. SO SO SO useful.....

GAZ / PROPANE Liberty

1 fixed 90 L permanent propane tank

1 8 kgs exchangeable standard propane tank

+ 465 g compact propane one use tank

- Stay hot or cold - anytime and all the time.

Gaz is so easy and practical

Propane is used for the fridge, the stove, oven, the cabin heating, the hot water heater and most importantly the BBQ!

- Travelling all over the Americas - we were a family of 4: took 4 showers a day and many nights in freezing weather and only filled up the main tank 6 times in a year.
- Fixed permanent 90 L (18 gallons) propane tank. We last 6 to 8 weeks on this tank alone! Easy to fill in all car propane stations or by gaz refill trucks. Fillable in all countries but Brazil (they should have the adaptor)
- We brought along a spare bottle. It is the standard USA and americas exchange bottle. You can find this very easily. Carries by hand. There is a hookup that allows this spare to be plugged to the main tank.
- Because you never know: we can also plug the small 1 pound bottles directly into the system. This is the same bottle the BBQ uses.
- Direct hookup of all bottle together.
- Safety Propane leak detector
- Safety carbon monoxide detector
- 3 fire stove and oven.
- Fridge and separate Freezer: 170 L (gaz & 110v)
- Cabin Heater: 30 000 BTU!
- Hot Water heater 23 L in 6 minutes.
-

DRIVING COMFORT

Well equipped for many km's behind the wheel.

- ***Some roads are very long.***
- 5 Speed Automatic gearbox with Tow / Haul option. (automatic electronic engine braking and climb mode)
- Transmission Cooler
- AC in front as well as the cabin
- ABS
- Cruise control
- Double Airbag
- Electrically adjustable mirrors with defrost
- Power windows
- Power door locks
- Tilt steering wheel
- Jensen Car Stereo / CD + FM + Météo / USB / iPod or iPad or iPhone
- Back Up Camera
- Total of 6 - 12v Plugs and central console
- At 107 000 kms: we Reinforced the Rear suspensions. We changed and reinforced the rear blades put in New rear shocks. New wheel bearings and brakes.
- At 107 000 kms': we also changed and reinforced the front coil springs, new shocks, new steering shock/damper, new bearings, new front pads.
- Tilting seats

EVERYDAY LIVING COMFORT

- *A real kitchen!*
- *A real master bedroom*
- *A private space for the kids*
- *A real bathroom for all.*
- ***An RV is a small space for a long and hard voyage. Why suffer? The biggest of luxuries is room. How many people stopped their travels because too crowded?***
- Large fridge that runs on gaz or 110V
- Seperate freezer compartment
- MicroWave Oven(on convertir or generator)
- Double Sink with cutting board, cover and dishes strainer.
- Range Hood with light and filter
- Dedicated Ceramic Filter faucet
- All cupboards and fridge are equipped with home made elastics to retain objects
- Home made second utensils drawer
- Seperate Showre with glass door and Aerator Head for a real shower feel
- Exterior Hot/Cold shower
- Bathroom sink
- Sliding glass security windows. With mosquito screens. Tinted against sun and glare. Lightly tinted to hide inside. Do you realize many RV's can't even open their tilt windows while driving?! Or when parked in the street.

INTERIOR CABIN

On Board Comfort

7 beds. Of which 4 (or 5) are permanent and big.

Independant bedrooms

Enough storage space for a real long voyage.

- All the room you need and yet it goes everywhere with ease.

Our motorhome is barely any bigger than the european campers (1 m longer, 10 cm's wider) Look at the pictures to compare - but offers an enormous improvement in interior room and comfort.

We can use the slide-out and have loads of room: yet keep it in if space is tight and still function better. No worries on rainy or cold days!

- The biggest and longest front nose (nacelle / bunk) on the market! And fiberglass protected!
- It allows 3 - yes 3 - single beds (80 x 180). Presently we have installed a home made separation and 2 beds : lengthwise. This creates 2 separate little privacy rooms / beds for growing children.
- Can be converted back to a grand triple bed in less than 15 minutes.
- A separate master bedroom offering a walk around queen size bed (160 x 188). No need to climb up either! And lots of headroom. generous cupboards (his / hers) on each side. A bit of privacy counts!
- If need be the dinette converts into a double bed in 5 minutes flat. 112 x 173 cm. Friends dropping over? One of the kids is sick?
- A real bathroom. Yes: a shower, separate toilet and even sink. With a vanity and large cupboard. And the bathroom is not inundated each time you take a shower.
- Slide Out dinette extension that really makes the inside feel big.

- 5 person Dinette table. With homemade extensions on the seats and table to accept 7 people in style.
- A very generous interior height of 2m13
- Arctic Isolation. A very thorough R14 isolation of the cabin, water tanks, and windows. Perfect for the mountains, chilly nights and HOT days.
- Sliding glass security windows. Tinted against sun and glare. Lightly tinted to hide inside. With sliding bug screens on all windows of course.
- Privacy blinds on all the windows. Stops light and looks!
- All indoor lights are DEL Lights in the cupboards and storage compartments. DEL light strip outdoors.
- Electrical and 12v plugs all over the place.
- 4000 W AIR Conditioning on sector or generator
- Pivotal captains chair
- Control console for all levels (gas, grey, black, fresh, batteries) in percentage. With remote control start of generator, hot water and heater.
- Fantastic Fan reversible automatic in/out fan with thermostat.
- Bathroom extraction fan and vent hood
- Car Stereo with 4 speakers. 2 in the cabin for stereo sound all over!
- Electronics Cupboard: This is a cupboard that integrates all our electronics in one place. We have 6 chargers installed so that we can recharge our computers, cell phones and tablets. There is full time 110V, and 12v for all your needs. All the wires, routers and etc are centralized here. No mess elsewhere.
- TV with integrated DVD player.
- PlayStation 3 - YES!
- HDMI switchover to use the TV as a monitor for all your stuff.

OUTSIDE AMENITIES

Solid and Practical

- 5 basement storages
- a huge 3 m2 rear storage
- Stainless Gaz BBQ for real outdoor pleasure
- Full size lockable foldable solid steel bike rack for 5 bikes
- power awning with lights

We have all the necessary - and then some creature comforts. Because when the weather permits: outside is where the life is. Thought and practicality has been integrated for your ease of use and practicality.

- Power electric awning to protect against the rain or the sun. Opens out or in in 10seconds at the push of a button.... Too tired to set up the awning ... not in this case.
- DEL light strip.
- Roof ladder
- 1m x 1m heavy duty metal roof rack with canvas bag and retention net
- Isolated full door. Full size mosquito screen door
- Outside shower
- Rear cargo hold / storage. More than 3000 liters of space. This is magical. lots of room for an easy access to all your stuff. Not too crowded. Equipped with lights, roof racks for sliding bins on the ceiling. Reinforced holder bars and quick connects, attachments points, weather proof.
- A large aluminium rear trunk (around 500 liters) More room and an easy access. Doubles as the bike rack. We use it to store the toys! cuba, balls, boards, etc.
- A strong and large bike rack. It can hold 5 maybe 6 bikes. It is theft proof, holds away to take up no room. Holds our full size kitchen table. We have a home made clothes dryer that hooks to it. (Psst

there is also a foldable clothes dryer in the shower.)

- You can remove the Bike rack / rear trunk in less than 15 minutes if desired.
- Napoleon brand stainless steel gaz BBQ 14000 BTU. Great grilling and no odors in the kitchen for a happy family.
- Steel Rear bumper. It also doubles as storage for the tow bar, sewer hoses and emergency road signals.
- gutters and extensions for a quick fill up of the water tanks when it rains.
- Under motor protection plate (protects the oil pan and transmission)
- Plexiglass reinforced front bunk nose. Not a cheap aluminium tin foil nose usually seen on other Rv'S). This one can survive the hazards of the road and keep you rolling. branches, birds or hazards won't stop you.
- Categorie 5 (+2500 kgs) REAR TOW hook
- Cat 5 FRONT tow attachment. (useful for the tow bar, pull a friend out, front bike rack, spare tire rack, extra bumper protection)
- full metal front and rear bumpers. You can actually hit things with these and not worry. this is not your wimpy plastic trash.
- Reinforced and new locks on nearly all the storage doors.
- 5 chassis storage compartments. waterproof, solid and so practical.

OTHER EQUIPMENT INCLUDED for an extra \$ 5000

A huge economy. For an extra 5000\$ we will leave you all this stuff:

- *Imagine the prince of all this stuff bought one at a time.*
- *It's all there. Bring your toothbrush and off you go see the world!*

No need to find this stuff in a country where it might not be easy to find.

- PlayStation 3
- All the necessary for the kitchen: pots, pans, kettles, glasses, plates, utensils, etc.... it's all there and easily for 6 people.
- All the bed wear: sheets, covers, blankets, comforter, pillows, pillow covers, etc
- Towels, bath towels, beach towels, hand towels, towels of every size.
- two 12 v fans. plus 1 - 110V fan. (much more silent than a 12v and remember you have 24/7 electricity)
- 2 fire extinguishers
- propane detector
- Carbon monoxide detector
- Smoke detector
- Water: All you need for the water: perfecter and cartridge, 4 different hoses, adaptors and convertors of all kinds, 3 sewer hoses, adaptors, covers, quick and slow connects ... etc)
- Electricity: ALL you need for electric hookups: Adaptors, convertors, polarity testers, 100m long, heavy duty, light duty, extensions cords, emergency 12 v charger, switches and more
- MECHANICAL: ALL the mechanical spare parts we haven't used: and they are all new: alternator, injectors, brake pads, bearings, plugs, belts, filters, light bulbs, fuses, toolset)

- ODB2 Code reader. This is the tool mechanics use to detect what is wrong with your vehicle. We have one. And it is multi-lingual: your mechanic is spanish? No problem. You can also RESET your own error codes. For example: drove above the 4000 m limit? No problem. Bad fuel and your motor went into crawl mode? No problem.
- Many boxes and bags and what not to store and hang all your stuff.
- Full size foldable 6 person table. 6 full size chairs. Big ground carpets, rugs, covers, etc...
- 150 Psi : full size air compressor. And all the necessary attachments. To inflate a tire, clean your vehicle or inflate a boat.
- Clothes racks, dryer lines, tow lines.
- Heavy duty tow lines, camping gear, lights, ax, machette, pails, pulleys, ropes, etc
- Tools: electrical drill, wrenches, ratchets, screwdrivers, saws, etc... a real gold mine to fix and repair all that might go broke!
- screws, collars, spare parts, windshield repair, plastic epoxies, radiator leak repairs, tire repair kits, tire slime, etc
- and tons of what nots to fix and replace.
- booster cables, two 10 ton jacks, ramps, levelers, squaring blocks, etc.
- fishing stuff: 3 rods, hooks, etc)
- emergency tool box: safety visibility jackets, flares, heavy duty tow, signs, gas siphons
- spare army metal gas tanks (3)
-
- AND SO MUCH MORE....
